PROFESSIONAL SUMMARY

Motivated Junior Communication and Electronics Engineer with a focus on mobile network automation. Possesses strong theoretical foundation in 4G/5G architectures, and Open RAN. Gained practical hands-on experience with Linux foundation, Bash scripting, and Ansible during NTI training. Proficient in SQL and using Python (Pandas/NumPy) for data analysis.

EDUCATION

4-Month HireReady – DEY Mobile Network Automation Track

National Telecommunication Institute (NTI)

Oct 2025 – Jan 2026

- Developed a strong theoretical foundation in mobile network architectures from 2G to 5G/6G, focusing on concepts of Open RAN, NFV, and SDN.
- Performed data analysis using Python, utilizing the libraries for data manipulation.
- Gained practical experience in automation and Configuration as Code (CaC) using Linux foundations, Bash scripting, and Ansible.

B.Sc. in Communication & Electronics Engineering

Higher Technological Institute (HTI), Egypt

Oct 2020 – July 2025

- Graduation Project: Enhancing BER and PAPR Using FBMC and UPMC.
- Relevant Coursework: Digital Communications, Antennas, Computer Networks.

PROJECTS

Building a Retrieval-Augmented Generation (RAG) System

Dec 2025

- Created a synthetic dataset for testing and implemented text preprocessing pipelines using tiktoken for tokenization.
- Developed a RAG system utilizing ChromaDB for vector storage and sentence-transformers for semantic embedding generation
- Integrated an LLM via API to generate context-aware responses based on data retrieved through cosine similarity search.

SKILLS

- Programming: Python, SQL
- Automation: Linux (Ubuntu/RHEL), Bash Scripting, Git, Docker
- Network Tools: GNS3, Wireshark, Packet Tracer, VMware
- Data & ML: Scikit-Learn, Pandas, NumPy, Matplotlib
- Platforms: Jupyter Notebook, VS Code
- Soft Skills: Teamwork, Communication, Time Management

LANGUAGES

- Arabic: Native
- English: Intermediate (B1)

TRAINING & COURSES

- HCIA-AI V4.0 Course Jan 2026 – Present
- Red Hat Enterprise Linux Automation with Ansible 9.0 Jan 2026 – Present
- Mobile Communication Networks (2G, 3G, 4G, 5G) Aug 2025 – Jan 2026
- Cisco Certified Network Associate Course Jun 2023 – Sep 2023
